PROFESSIONAL SUMMARY

MBA-qualified analytics professional with hands-on experience spanning business analysis, data analytics, MIS reporting, and business intelligence — building SQL- and Python-based analytical models on 1M+ row datasets, running R-based time-series and volatility analysis on 15+ years of market data, and designing Excel, Tableau, and Power BI dashboards that translate data into stakeholder-ready decisions. Domain depth includes fraud/AML and transaction-monitoring analytics, financial/market risk and portfolio optimisation (CAPM, VaR, Monte Carlo), and real-estate pricing and investment analytics. Well positioned for Business Analyst, Data Analyst, MIS, BI Analyst, and Financial Analyst roles, converting rigorous data analysis into measurable business impact.

CORE COMPETENCIES

Languages & Tools: SQL (PostgreSQL, MySQL: Joins, CTEs, Window Functions – LAG, LEAD, RANK, Subqueries) | Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn) | R | Advanced Excel (Power Query, Pivot Tables, XLOOKUP) | Power BI (DAX) | Tableau | Data Modelling & Validation

Business & Data Analytics: Business Analysis | Requirements Gathering | Stakeholder Management | Process Improvement | EDA | Statistical & Regression Analysis | Hypothesis Testing | Time-Series Forecasting | Root Cause Analysis | KPI & MIS Reporting | Dashboard Development | Data Visualization | Ad-hoc & Trend Analysis

Risk, Compliance & Finance: AML Transaction Monitoring | Fraud & Anomaly Analytics | Financial Crime Risk Scoring | Credit & Market Risk | Portfolio Optimisation (CAPM, VaR, Monte Carlo) | Financial Modelling | Scenario Analysis | ESG Analysis

KEY PROJECTS

NexaBank Analytics — Business & Financial Crime Intelligence System (PostgreSQL, Python, Excel, Tableau): Built 10 advanced SQL analyses (CTEs, window functions, z-score normalisation, RANK, PERCENTILE_CONT) across 1M+ transaction records, converting raw transaction data into business-ready risk and monitoring intelligence.

- Delivered detection and monitoring logic for high-risk transaction patterns (money-mule/SAR candidates, synthetic identities, fraud-ring contagion); quantified preventable business loss and ranked under- vs. over-resourced monitoring areas by efficiency gap to directly inform resource allocation.
- Built a behavioral drift model (early- vs. late-stage transaction behaviour) and a year-over-year pattern evolution analysis using behavioral-distance scoring to flag recurring/emerging risk trends for stakeholder reporting.
- Engineered an Excel Fraud Intelligence Dashboard (Power Query, 8 slicers, 7 linked charts, Pareto-ranked view) and a 4-sheet Tableau “Fraud Risk Command Center” with parameter-driven drill-down across a 4-table relational model.

MBA Applied Finance Coursework — Security, Portfolio, Statement & Derivatives Analysis (Excel, TradingView): Conducted multi-indicator technical analysis (moving averages, MACD, RSI, Stochastic) with systematic chart-pattern backtesting on equity futures; built CAPM-optimised portfolios and sized a derivatives hedge that cut portfolio volatility ~25%; ran common-size financial statement analysis flagging a capital-structure shift ahead of risk; tested Put-Call Parity and Black-Scholes pricing against market quotes.

PROFESSIONAL EXPERIENCE

Xanadu Realty

Bengaluru, Karnataka | Mar 2025 – Jun 2025

Management Trainee — Sourcing & Business Analytics

- Engineered competitor-pricing and project-benchmarking dashboards (Excel/Power Query) across 5+ active portfolios, delivering weekly pricing signals and MIS reports to senior leadership for go/no-go acquisition decisions.
- Analysed purchase histories and investment patterns for 200+ buyers across channel-partner networks; translated findings into client-level pitch strategies that lifted qualified walk-in conversion by 18%.
- Produced Joint Business Partner (JBP) pipeline reports tracking 6 revenue KPIs per partner, enabling channel managers to monitor targets and act on conversion bottlenecks in real time.

MCX India

Hyderabad, Telangana | Apr 2024 – May 2024

Research & Analytics Intern — Financial & Policy Analytics

- Analysed risk-return dynamics and Value-at-Risk across 5 base metals (Aluminium, Copper, Lead, Nickel, Zinc) on MCX spot prices, and benchmarked ESG/SDG mining-compliance practices across 4 global regions (India, China, Europe, America) to inform quarterly, correlation-driven investment strategy.
- Built interactive Excel and R dashboards visualizing price behaviour, downside risk exposure, and ESG compliance metrics, distributed to institutional and retail investor audiences.
- Acknowledged for research contribution to MCX–ICFAI Business School study on price-risk hedging and ESG-SDG integration, ranked 1st among peer submissions (2024 cohort).

G.R. Enterprises

Bokaro Steel City, Jharkhand | Dec 2020 – Jan 2023

Client Operations & Compliance Executive

- Authored and maintained 10+ SOPs covering client operations and compliance workflows; designed and delivered training programs for multiple technician cohorts, sustaining zero operational deviations across a 2-year tenure.
- Managed compliance documentation and escalation frameworks for key client operations, maintaining a zero-grievance client record and audit-ready processes.

EDUCATION

MBA in Finance & Analytics

2023 – 2025

IBS Hyderabad, IFHE University | CGPA: 7.42/10

M.Com in Business Administration

2018 – 2020

Pune University | First Class with Distinction (84%)

B.Com in Cost & Works Accounting

2015 – 2018

Pune University | First Class with Distinction (80.58%)

CERTIFICATIONS & ACHIEVEMENTS

- Data Science Program — E&ICT IIT Guwahati** (Expected: Aug 2026) | SQL (PostgreSQL), Advanced Excel, Power BI, Python | In progress: GenAI & Machine Learning.
- PwC Women Leadership Development Program (WLDP)** — Strategic decision-making, leadership, and governance frameworks.
- Published Research** — Acknowledged for research support on a pan-India survey studying commodity price-risk hedging practices among base-metal firms, MCX–ICFAI Business School study, published on MCX India’s Research Studies portal.
