PROFESSIONAL SUMMARY

Finance professional (MBA) with hands-on experience across data analytics, financial modelling, and business intelligence built SQL- and Python-based analytical models on 1M+ row datasets, ran R-based time-series and volatility analysis on 15+ years of market data, and designed dashboards in Excel, Tableau, and Power BI that translate data into decisions. Domain experience spans fraud/AML analytics and transaction-monitoring logic, market risk and portfolio optimisation (CAPM, VaR, Monte Carlo simulation), and real estate pricing and investment analytics — underpinned by strong statistical analysis, forecasting, and financial modelling. Well positioned for Data Analytics, Financial Analysis, or Risk Management roles, where rigorous, data-driven analysis translates directly into measurable business impact.

CORE COMPETENCIES

Languages & Tools: SQL (PostgreSQL, MySQL: Joins, CTEs, Window Functions (LAG, LEAD, RANK), Subqueries) | Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn) | R | Advanced Excel (Power Query, Pivot Tables, XLOOKUP, Statistical Modelling) | Power BI (DAX) | Tableau

Risk & Compliance: AML Transaction Monitoring | Fraud Analytics | Financial Crime Risk Scoring | SAR/Money-Mule Detection | Synthetic Identity & Anomaly Detection | KYC & Regulatory Compliance | Scenario Analysis | Hypothesis Testing | Regression Analysis | VaR | Monte Carlo Simulation | CAPM | Portfolio Optimisation | Credit & Market Risk | ESG Analysis

Analytics & BI: EDA | Time-Series Analysis & Forecasting | Predictive & Behavioral Analytics | Network/Relationship Analysis | Campaign Measurement | ROI & Variance Analysis | KPI Reporting | Financial Modelling | Data Visualization | Dashboard Development | MIS Reporting

KEY PROJECTS

NexaBank Analytics — Financial Crime & Fraud Intelligence System (PostgreSQL, Python, Excel, Tableau): Authored 10 advanced PostgreSQL analyses (CTEs, window functions, z-score normalisation, RANK, PERCENTILE_CONT) across 1M+ transaction records, replicating institutional transaction-monitoring logic.

- Built detection logic for money-mule/SAR candidate identification, synthetic identity flags, and fraud-ring contagion speed; quantified preventable loss from delayed ring response and ranked under- vs. over-policed fraud patterns by resource-efficiency gap.
- Developed a pre-crime behavioral drift model (early- vs. late-stage transaction behaviour) and a year-over-year fraud pattern evolution analysis using behavioral-distance scoring to flag recurring/emerging typologies.
- Engineered an Excel Fraud Intelligence Dashboard (Power Query, 8 slicers, 7 linked charts, Pareto-ranked fraud-by-time-window view) and a 4-sheet Tableau “Fraud Risk Command Center” with parameter-driven drill-down across a 4-table relational model.

Portfolio Optimisation & Market Risk Assessment (Excel): Built a multi-asset portfolio using CAPM and Efficient Frontier analysis; stress-tested via VaR and Monte Carlo simulation across market-crash, liquidity-crisis, and bull-market scenarios to set risk-adjusted breach thresholds.

PROFESSIONAL EXPERIENCE

Xanadu Realty

Bengaluru, Karnataka | Mar 2025 – Jun 2025

Management Trainee — Sourcing & Analytics

- Engineered competitor-pricing and project-benchmarking dashboards (Excel/Power Query) across 5+ active portfolios, delivering weekly pricing signals to senior leadership for go/no-go acquisition decisions.
- Analysed purchase histories and investment patterns for 200+ buyers across channel-partner networks; translated findings into client-level pitch strategies that lifted qualified walk-in conversion by 18%.
- Produced Joint Business Partner (JBP) pipeline reports tracking 6 revenue KPIs per partner, enabling channel managers to monitor targets and act on conversion bottlenecks in real time.

MCX India

Hyderabad, Telangana | Apr 2024 – May 2024

Research & Analytics Intern — Financial & Policy Analytics

- Modelled volatility and cyclical risk patterns across 15+ years of MCX base-metals price data using time-series analysis in R, improving forecast accuracy over baseline heuristics.
- Built interactive Excel and R dashboards visualizing price behaviour, downside risk exposure, and ESG compliance metrics, distributed to institutional and retail investor audiences.
- Acknowledged for research contribution to MCX–ICFAI Business School study on price-risk hedging and ESG-SDG integration, ranked 1st among peer submissions (2024 cohort).

G.R. Enterprises

Bokaro Steel City, Jharkhand | Dec 2020 – Jan 2023

Client Operations & Compliance Executive

- Authored and maintained 10+ SOPs covering client operations and compliance workflows; designed and delivered training programs for multiple technician cohorts, sustaining zero operational deviations across a 2-year tenure.
- Managed compliance documentation and escalation frameworks for key client operations, maintaining a zero-grievance client record and audit ready processes.

EDUCATION

MBA in Finance & Analytics

2023 – 2025

IBS Hyderabad, IFHE University | CGPA: 7.42/10

M.Com in Business Administration

2018 – 2020

Pune University | First Class with Distinction (84%)

B.Com in Cost & Works Accounting

2015 – 2018

Pune University | First Class with Distinction (80.58%)

CERTIFICATIONS & ACHIEVEMENTS

- Data Science Program — E&ICT IIT Guwahati** (Expected: Aug 2026) | SQL (PostgreSQL), Advanced Excel, Power BI, Python | In progress: GenAI & Machine Learning.
- PwC Women Leadership Development Program (WLDP)** — Strategic decision-making, leadership, and governance frameworks.
- Published Research** — Acknowledged for research support on a pan-India survey studying commodity price-risk hedging practices among base-metal firms, MCX–ICFAI Business School study, published on MCX India’s Research Studies portal.
